Maura K. Randall

HEAD OF PRODUCT · AI PRODUCT STRATEGY · PLATFORM, MARKETPLACE & COMMERCE AT SCALE

347-497-0493 · maurakrandall@gmail.com · Austin, TX (open to relocation) · linkedin.com/in/maurakrandall · maurakrandall.github.io · aigal.io · thehumanailoop.com

EXECUTIVE SUMMARY

Product and platform leader with 20+ years across six industries: HR technology, ecommerce, marketplaces, media, community-led growth, and enterprise SaaS. Led the platforms behind Atlassian's 78M+ MAU, where users engaged in community were 7x more likely to repurchase. Launched Best Offer at eBay, the marketplace's first price negotiation platform, to $1B+ in transactions in year one. Took Yahoo!'s first community-led UGC platform from zero to 14M users and $40M in revenue in year one. Both launches are patented. A people leader throughout, with 15 direct reports across three countries, a digital organization grown from 3 to 15, funded team expansion won through business cases, and PMs mentored into senior leadership. Founder of AIGal.io, a public human-AI collaboration practice with a published methodology, shipped products, and two years of writing. Recognized externally as an "AI-native product leader" by Tom Tsao, GVP at DocuSign, based on that published work.

CORE EXPERTISE

AI Product Strategy & Applied AI: the Human-AI Loop methodology for designing where automation ends and human judgment has to be supplied; ML recommendation, ranking and personalization systems in production; evaluation routines and governance frameworks; AI adoption, literacy and enablement

Product & Platform Leadership: 0→1 and 1→N at platform scale; shared components, APIs and tooling adopted by teams under no obligation to use them; experimentation frameworks (A/B, multivariate, funnel) embedded org-wide; buy-versus-build and platform-partner selection

Global People & Organization Leadership: 15 direct reports across Taiwan, Hong Kong and the US; digital organization grown 3 → 15; engineering partnerships in India and Ukraine; funding won across four fronts through business-case development; PMs mentored into senior leadership

Commerce, Marketplaces & Media: negotiation and pricing mechanics; two-sided marketplace dynamics and seller conversion; metasearch and CPC/CPA economics; content-to-commerce, affiliate and embedded checkout; community-led growth and moderation at scale

LIVE AI PRACTICE · BUILT WITH AI TEAMMATES · ALL DEPLOYED · ALL PUBLIC

- **thehumanailoop.com** · the Human-AI Loop methodology (Test → Build → Codify → Share), plus a working simulation at try.thehumanailoop.com.
- **aigal.io** · AI literacy library, published frameworks, and the AI on Our Teams Manifesto.
- **maurakrandall.substack.com** · two years of the practice, published as it happens. Field notes, not theory.
- **maurakrandall.github.io/triad-in-slack** · a working simulation of a mixed human and AI team, where the machine surfaces what it cannot know and asks.
- **Daily Fuel · Opportunes.io** · consumer products taken 0→1 with AI teammates; in usability testing and entering build.

PROFESSIONAL EXPERIENCE

AIGal.io · Founder, The Human-AI Loop

JANUARY 2024 – PRESENT

Human-AI Collaboration Practice & Applied AI Product Development · Austin, TX

—Built a public practice for human-AI collaboration: a publication, a complete methodology (Test → Build → Codify → Share), and a live simulation where product leaders experience designed collaboration in five minutes

—Ships working prototypes with a mixed team of AI collaborators on distinct roles, publishing the method and the failures alongside the results; developed strategic point-of-view artifacts on applied AI for organizations across enterprise software, marketplace and media

Atlassian · Senior Group Product Manager

2018 – 2023

Community & Self-Help · San Francisco HQ · Austin, TX

—Built platform primitives adopted across the org: onboarding flows, self-service tooling, and experimentation frameworks (A/B, multivariate, funnel) embedded org-wide so other teams could measure their own outcomes independently

—Led the product and platforms powering authoring at 78M+ MAU, including the full moderation suite and the help-content and creator authoring experiences. Users engaged in community were 7x more likely to repurchase

—Partnered with ML engineering on recommendation systems for the community feed; designed the AI/ML integration strategy including sentiment analysis, proactive recommendations and personalized guidance, with evaluation routines and governance frameworks attached

—Won funding across four fronts through business-case development: tripled the Community Engineering team, secured surge engineering capacity through SoftServe in Ukraine to protect committed dates, funded added design and research, and brought in outside consultancy to pressure-test replatform decisions before committing spend

RECOGNITION ★ CMX COMMUNITY OF THE YEAR · '19 & '20 ↗ ★ FEVERBEE BEST COMMUNITIES · 2020 ↗

MKR Consulting · Founder & Principal 2016 – 2018

Product Consulting · New York, NY

—Owned full client engagement lifecycle for female-founded startups, discovery through launch and sustained adoption; 100% of clients secured initial funding, 50% accepted into competitive accelerators, one closed a multi-million dollar seed round

Condé Nast · Digital Managing Director (GM) 2010 – 2015

Lucky Magazine · New York, NY

—Launched both halves of the operation from zero: LuckyShops, Condé Nast's first affiliate commerce program, and the editorial authoring tools editors published through. Sourced, evaluated, integrated and managed the ecommerce, affiliate technology and CMS platform partners underneath, a buy-versus-build call made four times over

—Ran very early dynamic-checkout experiments with Skimlinks and TwoTap, embedding the transaction into the content layer rather than sending the reader elsewhere to complete it

—Grew the digital team 3 → 15, hiring, structuring and mentoring the organization; grew digital presence to 2M+ monthly uniques with 4x social growth and won MIN's Best Community awards in 2013 and 2014

Yahoo! · Director of Product Management 2006 – 2010

Lifestyles, Shopping & Social Network · Media Business Unit / Entertainment · Sunnyvale & Santa Monica, CA

—Led the horizontal PM team shipping shared engagement components (likes, comments, posts, sharing) across Yahoo! verticals that were under no obligation to adopt them. Drove the shift from every team building its own to shared components and APIs, winning consistency through adoption rather than mandate. This is the earliest instance of the pattern that repeats through the rest of this page

—Launched Shine, Yahoo!'s destination site for women, from concept to launch (0→1): the destination experience plus the authoring tools behind it, built separately for editors, content producers and community members. Yahoo!'s first community-led UGC platform, it reached 14M users and $40M revenue year one and is patented; lifestyle communities reached 50M+ MAU

—Led a global PM team of 15 direct reports across Taiwan, Hong Kong and the US, shipping multi-region experiences and building trust across three cultures that disagree differently, build consensus differently, and need different kinds of context

—Led community and social engagement features for Yahoo! Shopping, a CPC/CPA-monetized meta-search commerce destination and one of Yahoo!'s top revenue-generating properties. Increased return visits and multi-click behavior, the engagement behaviors that convert directly to revenue under that model

eBay · Sr. Global Product Manager 2004 – 2005

San Jose, CA

—Led the cross-functional team that launched Best Offer, eBay's first price negotiation platform (0→1), powering $1B+ in transactions in year one. Joined in 2004 to build it; it launched in 2005. Built with an engineering team in India

—Designed recommendation and pricing algorithms that lifted feature adoption 4.7% and seller conversion 1.36%, and built the tools buyers and sellers used to communicate through a negotiation

—Negotiated placement and calls to action across buyer and seller surfaces owned by other product teams, at a company deeply loyal to its auction format. Approval bought the build; every surface had to be won separately on user research and conversion evidence

RECOGNITION ★ EBAY GLOBAL PRODUCT MANAGEMENT AWARD · Q1 2005

★ EBAY GLOBAL PRODUCT MANAGEMENT AWARD · Q3 2005, BEST OFFER LAUNCH

BrassRing (Kenexa/IBM) · Sr. Global Product Manager 2000 – 2003

Santa Clara, CA

—Joined a venture-backed startup and went from individual contributor to owning product, production and customer support; built the award-winning job-seeker platform earning WEDDLE's Users' Choice Awards in 2001 and 2002, delivering scalable SaaS with candidate management workflows and enterprise system integration

PATENTS · ISSUED ON 0→1 LAUNCHES

Network-based commerce facility offer management methods and systems · US 8,160,928 · eBay, Best Offer

Computer user interface for a display screen · US D611,490 · Yahoo! · issued March 9, 2010

ENDORSEMENTS · ATLASSIAN, CONDÉ NAST, YAHOO!, EBAY

“Maura ships, and does so ensuring that her product launches deliver value and exceed expectations for quality and success.”

SCHER FOORD · EXPERIENCE DESIGN ARCHITECT, CONDÉ NAST

“People are even more of the core in this new world. With Maura's “people” and technical acumen, I know she will continue to nail it in her career.”

RENEE VONBERGEN · VP PRODUCT MANAGEMENT, DATA & AI · HER MANAGER AT EBAY · 2026

“[Shine] ended up being very profitable for Yahoo and owed much of that to Maura's leadership.”

JAMES LONG · STAFF SOFTWARE ENGINEER, YAHOO! SHINE

“Her ability to craft a compelling vision and strategy, to diplomatically influence and build alliances… were key to the success.”

ALICE MERLINO · PROGRAM MANAGEMENT, ATLASSIAN

EDUCATION & AI COURSEWORK

George Mason University · Communications, TV / Video Production

Hired by GMU's instructional development office before graduating, teaching faculty to adopt new technology. Still the work.
